1. Portfolio Website:

Crafted with Flutter, this portfolio website boasts a responsive UI and clean architecture. Using packages like animated text kit, simple icons, and cached network image, it ensures engaging visuals. With PWA export, the site delivers a seamless, installable experience, all hosted on GitHub for collaborative development.

2. Twitch Clone (a video calling app):

Designed and developed a Flutter/Dart app mirroring Twitch, seamlessly integrating Firebase for real-time chat, database, and authentication. Utilized Agora for robust video streaming and optimized functionality with key packages: dotted border, video player, agora rtc engine, and permission handler.
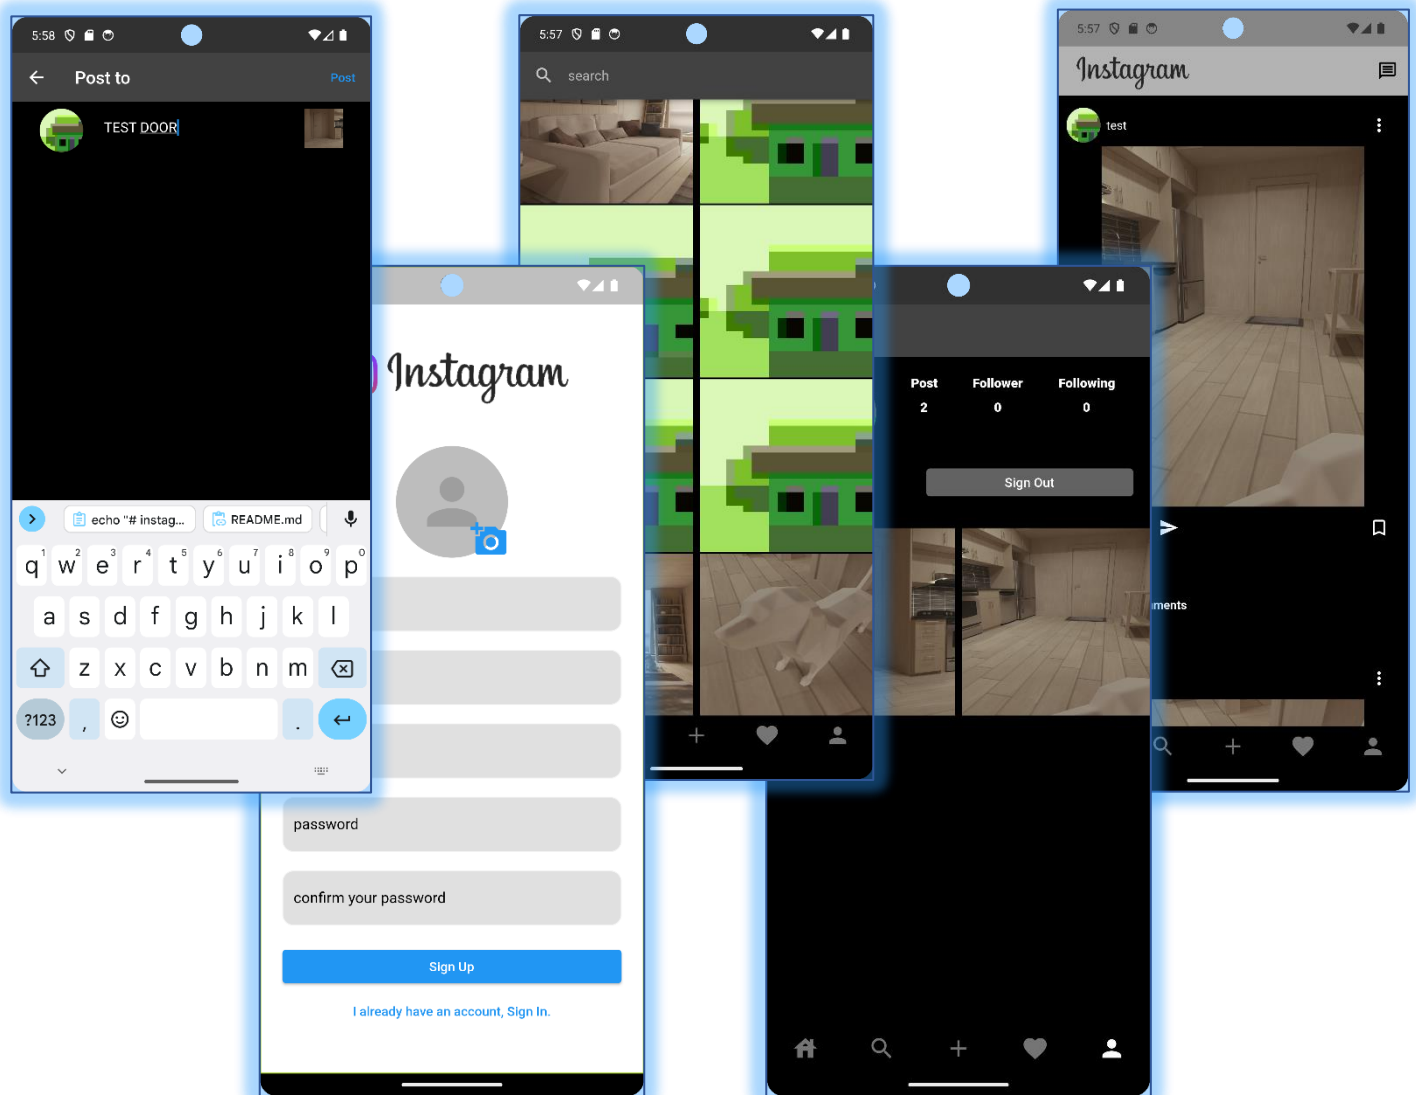

Source: https://github.com/aemami76/twitch

3. Instagram clone:

Develop an Instagram-inspired app with Firebase as the robust backend, utilizing streams for a responsive frontend. Leveraging key libraries, including "firebase_auth", "cloud_firestore" and "flutter_staggered_grid_view" ensures a professional and feature-rich application seamlessly blending design and functionality. This app can be run in Android, IOS and web.

4. Chat App with Supabase:

Craft a principled chat app using Supabase instead of Firebase amid industry concerns. Enhance user experience with "timeago" for sleek timestamps and "supabase_flutter" for seamless frontend-backend integration
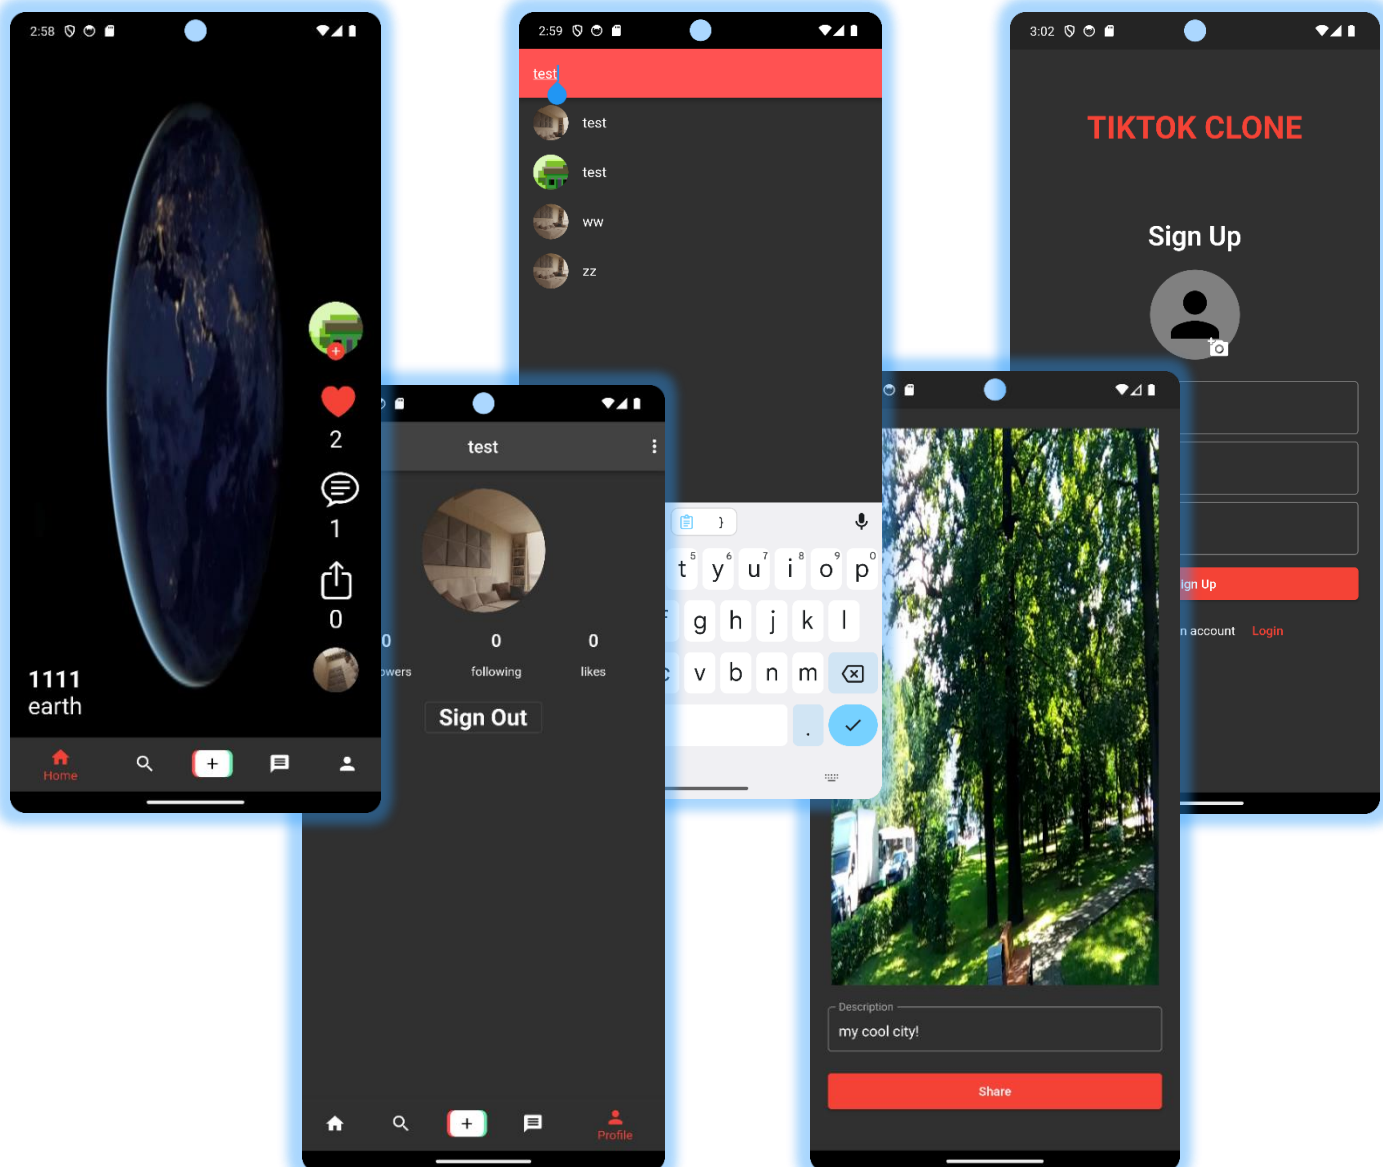

Source: *https://github.com/aemami76/chat_app*

5. Tiktok Clone

A dynamic project using Firebase and Firestore for backend and database, GetX for efficient state management, and integrate "image_picker," "video_player," and "permission_handler" libraries for a seamless, user-centric experience.
